

VisitTek™

Telehealth Practice Management System

SPECIFICATIONS

- Mobile-friendly (Apple, Android)
- Multiple Browser Support
- Secure HIPAA Compliant Video Call
- Time-stamped Smart Session Login (Link - Code)
- Multi-channel Notification (Text - Email)
- Multiple Profile Management
- Interactive Waiting Room
- Complete Visits History
- Content Direct Access
- Friendly Direct Pay
- Smart Provider Notes
- Advanced Scheduling
- Multi-level Security

Customizable Cloud Interface

Customizing the cloud interface with your own practice identity (Name, Logo) will serve more like opening a new service facility than just offering your patients video calling service.

Integrated Billing Features

Includes billing capabilities with codes being saved to a database and exportable to CSV. Exportable provider notes (PDF, DOC and more). Access, print and export visits history and more...

Smart Scheduling and Efficient Visit Management

Patient scheduling, text and email automatic reminders, time-stamped links and codes to access the waiting room and other smart features that will impress your patients and improve revenue stream.

Increase Patients' Care and Doctors' Satisfaction

Access and share resources and graphic files directly within the telemedicine session screen.

This will provide patients with a seamless experience to get doctors to focus on patient care not on how to manage files.
